KS-868E(433SF/GSM-1) Network Intelligent Alarm System		
Panel size:L*W*H(mm)	264.2 * 179.6 * 47.6	
Brief Instruction		
<p>A Network Intelligent Alarm System which adopts advanced technology of digital sensor and controlling, consoled with LCD display, come with 16 wireless and 4 wired zones,work with various wired and wireless detectors produced by Karassn company, maximum 8 remote controllers, can store 8 pre-set telephone number. Once alarm triggered, built-in siren will activated immediately and dial pre-set number at same time. It can be widely used at home, community, financial office and office building,ect.</p>		
Main Function		
1). LCD Display		
2). 16 wireless + 4 wired zones		
3). Two modes of Multi-user & Mono-user can be exchanged		
4). Enroll 8 remote controllers		
5). 7 zone attributes: burglar, perimeter, duress, panic, fire, gas and medical		
6). Easy code enrollment for wireless detectors		
7). 8 Pre-set numbers can be set for user or CID		
8). Support CID		
9). 20s voice record		
10). Access codes; 1 installer code, 1 master code, 8 user codes and duress code		
11). Two timers for different time schedule		
12). Record 30 logs of alarm for query		
13). Alarm delay/ Arm time can be set from 000-255s		
14). Circulated dialing times ensure reliability		
15). Three ways for siren: Built in, wired and wireless		
16). Three level of volume		
17). Warning alarm for line-cut, different status and self-testing		
18). Remote operation via mobile phone		

19). GSM + PSTN	
20). AC/ DC: Ext 220V voltage and backup rechargeable batteries	
GSM Module	
<p>The GSM alarm module is a network intelligent alarm terminal device, which is composed of mainstream industry GSM module and the communication carrier by GSM network. It has different ways of combination for alarm, such as make alarm to ADEMCO Contact ID alarm center, Dialing voice, English SMS, Timer communication, etc. It is endowed with precise and timely transmission in alarm information. Moreover, it has the advantages of little influence by environment, low rate of false alarm, safety, convenient installation and environmental protection. Therefore, it can be the strong shield for your home.</p>	
Main Function	
1). Support ADEMCO CID alarm center, Dialing voice, English SMS, Timer communication	
2). Modular cordwood design	
3). English message hint for operation and alarm.	
4). Different alarm ways to combine: center, SMS, dialing, Timer, etc	
5). Various ways of Arm/ Disarm, which including SMS, Dialing or Ringing	
6). Multi-level of protection, such as code protection, classification operation, and phone firewall, etc	
7). Assign an English name to every zone. It is convenient for user to identify the position	
8). 3 groups of program phones and 8 groups of alarm phones.	
9). Sending start-up SMS, sending information and sending report ON/ OFF are for option.	
10). The dialing/ ringing time can be set	
11). 20s voice can be recorded	
12). All the settings are conserved in the memory card of GSM module to avoid losing when power off	
13). SMS can query the setting at all times	
14). It can conserve and SMS query with 100 pieces of alarm event log with the function of 'Black Box'	
Standard Kit	One KS-868E panel Two KS-12B Wireless Remote Controllers One power adaptor One GSM module 1.3AH DC12V NI-HI battery
Package weight	2. 1KGS
Carton:	12PCS
MOQ:	100PCS
Price	USD103. 17
