Hunt Electronic launches its new 2MP speed dome network camera HLT-S7CD

This network camera, powered by PoE, complements its outdoor product lines, being able of streaming at up 30fps. This camera includes features as **20x optical zoom** lens, 360° continuous pan and 180° tilt range rotation.

With a focal length of **4.7 ~ 94.0 mm** and with an IP66-rated housing, the **HLT-S7CD** ensures non-stop operations under extreme weather conditions. The built-in heater allows full performance between -20° to 55°C temperature ranges, making this network camera be operated in many diverse applications as: airports, hotels, jails, schools, **concentration of people**, parking lots, shopping malls, factories and almost every place **with high concentration of people**, which makes compulsory a trustable surveillance solution.

The **HLT-S7CD** is capable of rotating with a speed range of **0.45° ~ 200°** per second, allowing the user to accurately position the camera at targets. The **20x optical zoom** lens enables the **HLT-S7CD** to capture images in great detail at high quality, being ideal for monitoring wide indoor and outdoor environment, where challenging surveillance conditions require high reliability and precision.
