

Rapidly build, optimize and expand AES-IntelliNet[®] networks

AES-IntelliStart

Alarm monitoring companies that want to reduce dependence on public service providers are increasingly relying on AES Corporation's private and fully owner operated communication networks. With the AES-IntelliStart bundled services and product offering, network owners and operators can easily optimize and scale their AES-IntelliNet network.

AES-IntelliStart takes the guesswork out of building AES networks. The AES team is here to assist every step of the way with advance planning, onsite installation, field testing, and training. By leveraging AES experts and best practices, you can get up and running on AES-IntelliNet in one week or less and realize:

- Successful installation, maintenance, and expansion of your network
- Accelerated deployment with improved staff and resource efficiencies

Choose the AES-IntelliStart package that best suits your business

Central Station Starter Network Package

Designed for full-service central station installing alarm companies that want to expand their business, this package comprises AES advanced project management, on-site training and knowledge transfer, as well as factory certification of the AES-MultiNet system and oversight of the network programming and installation. It includes a follow-up network health assessment, as well as a Starter Network Kit.

IP Link Starter Package

For alarm installing companies that use a contract central station for monitoring services and want to expand their existing business, this offering includes AES advanced project management, on-site training and knowledge transfer, as well as factory certification and oversight of the IP Links installation and programming. It also includes follow-up network health assessment and a Starter Network Kit.

Disaster Recovery Package

Designed for full-service central station installing alarm companies that want to expand existing capacity or implement a disaster recovery solution, this package includes AES advance project management, on-site training and oversight of the Central Station Receiver installation.

About AES Corporation

AES Corporation is the leading manufacturer of code compliant wireless alarm communication products and solutions serving commercial security markets and government agencies worldwide. AES-IntelliNet® patented technology will never sunset compared to obsoleting technologies such as cellular and traditional phone lines. AES private mesh radio networks are owner operated and controlled, providing infinite scalability and superior reliability with the fastest transmission speed available. Over a half million AES Smart Subscribers are installed worldwide. AES is the clear choice for life safety and security, protecting people and property for over 40 years.
