# midpoint SECURITY

Mobile Access & Attendance Terminal MATE-C

MATE-C is driven by Credo Mobile Access Platform that offers special security & safety features.

One device can handle outgoing and incoming people traffic, providing valuable information of who is on site at all times. The application supports work safety parameters and alerts security guards if safety training, medical or any other permits of user are expired. Security guards can see employee and visitor photos for positive visual identification, and use the device to take photos of users for event archive as well as add text comments.

The device can hold an unlimited number of users and unlimited number of events and is equipped for full-featured offline operation. As soon as the connection to the main server is re-established, MATE-C uploads stored events and downloads changes of user database.

The versatility of the device and the application, allow turning it into a time & attendance terminal. It can remain hand-held, or it can be wall mounted for use as a self-service kiosk. Upon arrival employees present their RFID cards or type in employee numbers and the transaction is registered and forwarded to an HR or ERP application, together with user snapshot to prevent buddy punching.

Hardware specifications*:

- Screen size: 5"
- Stand-by time: 300h
- Operation time: 20h
- Operation in WiFi and 2G/3G/4G networks
- Front & back cameras
- CPU: Quad code
- RAM: 2GB
- Operating system: Android 4.x
- Unlimited number of users and events
- NFC integrated
- IP68 rated
- Supported card technologies: Mifare CSN, HID 125Khz Proximity, HID 13.56 iClass (Sector data)**

BENEFITS:

- ☑ **COMPLETELY MOBILE**
- ☑ **ALL MAJOR CARD TECHNOLOGIES SUPPORTED**
- ☑ **FULL OFFLINE OPERATION**
- ☑ **HANDLES MULTIPLE PERMITS PER USER**
- ☑ **ADD MOBILE VERIFICATION TO YOUR HID, MERCURY OR SUPREMA-BASED ACS.**
