

1 hour to poke the panel just for **setting up?**

-**Too slow.** What would happen when 10 customers ask for serving in the same day?

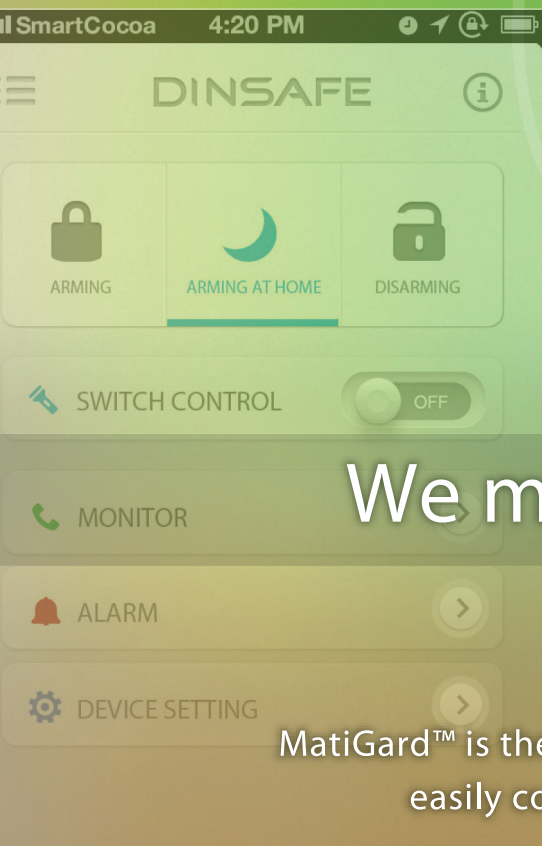

Still using SMS command to control your alarm system?

-But what's the point if the **phone numbers** of it **leak out?**

You are using the most powerful system. Right?

-Unfortunately, someone just **cut off** your **power** supply with a pair of scissors.

• • • *That's why we design MatiGard™.*

We made things different.

MatiGard™ is the only fully-encrypted alarm system in the world, easily configured by PC and controlled by phone.
