KS-899E(433SF/GSM-1) Network Intelligent Alarm System with GSM		
Panel size:L*W*H(mm)	210 * 150 * 54	
Brief Instruction		
<p>A Network Intelligent Alarm System which adopts advanced technology of digital sensor and controlling, consoled with LCD display, come with 16 wireless and 4 wired zones,work with various wired and wireless detectors produced by Karassn company, maximum 8 remote controllers, can store 8 pre-set telephone number. Once alarm triggered, built-in siren will activated immediately and dial pre-set number at same time. It can be widely used at home, community, financial office and office building,ect.</p>		
Main Function		
1). LCD interface		
2). 16 wireless + 4 wired zones		
3). Enroll 8 remote controllers		
4). 7 zone attributes: burglar, perimeter, duress, panic, fire, gas and medical		
5). Easy code enrollment for wireless detectors		
6). 20s voice record		
7). 8 Pre-set numbers can be set for user or CID		
8). Support CID		
9). Alarm event can be recorded and queried		
10). Identify alarm type automatically		
11). Remote control via mobile		
12). Three ways for siren: built-in, wired and wireless		
13). Circulated dialing times ensure reliability		
14). Warning alarm for line-cut, different status and self-testing		
15). Alarm delay/ Arm time can be set from 000-255s		
16). Multiplw ways of Arm/ Disarm		
17). AC/ DC: Ext 220V voltage and backup rechargeable batteries		
GSM Module		
<p>The GSM alarm module is a network intelligent alarm terminal device,which is composed of mainstay industry GSM module and the communication carrier by GSM network. It has different ways of combination for alarm,such as make alarm to ADEMCO Contact ID alarm center, Dialing voice, English SMS, Timer communication, etc. It is endued with precise and timely transmission in alarm information. Moreover, it has the advantages of little-influence by environment, low rate of false alarm, safety, convenient installation and environmental protection. Therefore, it can</p>		

be the strong shield for your home.

Main Function

- 1). Support ADEMCO CID alarm center, Dialing voice , English SMS, Timer communication
- 2). Modular cordwood design
- 3). English message hint for operation and alarm.
- 4). Different alarm ways to combine: center, SMS, dialing, Timer, etc
- 5). Various ways of Arm/ Disarm, which including SMS, Dialing or Ringing
- 6). Multi-level of protection, such as code protection, classification operation, and phone firewall, etc
- 7). Assign an English name to every zone. It is convenient for user to indentify the position
- 8). 3 groups of program phones and 8 groups of alarm phones.
- 9). Sending start-up SMS, sending information and sending report ON/ OFF are for option.
- 10). The dialing/ ringing time can be set
- 11). 20s voice can be recorded
- 12). All the settings are conserved in the memory card of GSM module to avoid losing when power off
- 13). SMS can query the setting at all times
- 14). It can conserve and SMS query with 100 pieces of alarm event log with the function of 'Black Box'

Standard Kit

One KS-899E panel
One KS-307DCT Wireless PIR Detector
One KS-21AW Wireless Door Sensor
Two KS-12B Wireless Remote Controllers
One GSM module
1.3AH DC12V NI-HI battery

Package weight(kg):

1. 8

Carton:

14PCS
