

PoE Surveillance Networks Beyond the 100m Limit

LevelOne Extended Range Indoor/Outdoor PoE Repeaters

LevelOne offers a range of indoor and outdoor Power over Ethernet extension options that are suitable for extending power and data networks up to 800m. This allows for flexible installation of IP based PoE surveillance cameras beyond the standard 100m PoE network limit at locations that do not have easy access to power points.

LevelOne offers three type of solution for reaching greater distances in a PoE network

PoE Repeater over Cat.5		PoE Repeater over 2-wire		PoE Repeater over Coaxial	
					
POR-0100 1-Port Indoor PoE Repeater	POR-1102 2-Port Outdoor PoE Repeater	POT-0100 PoE Repeater over 2-wire (Master)	POT-1110 Outdoor PoE Repeater over 2-wire (Slave)	POX-0100 PoE Repeater over Coaxial (Transmitter)	POX-0102 PoE Repeater over Coaxial (Receiver)
