

Patrol Tour Data Collection Terminal

Introduction:

The **NEW !!** WM3000N is a new developed Patrol Tour Data Collection Terminal based on Radio Frequency identification technology (RFID). It scans RFID tags and stores their ID-codes in a Journal memory, together with the date/time stamp. Featuring backlight LCD screen, non-volatile Journal memory and low-power operation. The BC3000N is an interface and download cradle bundled to WM3000N to work together at work of Patrol Tour for facility or assets management and more.

Features:

- ☆ **Simple one-touch operation to scan each station**
- ☆ **Comprehensive Journal with 8192 records**
- ☆ **AAA size battery, easy to replace and maintain**
- Application Download Port (ADP) for quick data download
- Portable and rugged for daily use.
- Password protected software
- Easily produce detailed guard tour reports by downloading data from WM3000N.

※ Specification is subject to change without notice.

Specifications:
