### Applications:

The GKB Home Care Surveillance System is an ideal solution for home care surveillance features easy connection and easy installation. Locations that are well-suited to GKB Home Care Surveillance System include:

- Home
- Schools
- Kindergartens
- Senior Centers
- Nursing Homes
- Hospitals

### zIP View™

IP Software for GKB PnP IP cameras. Management for up to 36 cameras.

## Advantages of GKB Home Care Surveillance System

### • Easy Installation and Setup

Only 4 steps to install and setup the PnP IP camera and zIP View™ software, it is even easier than installing an analog surveillance system.

### • E-mail Notice and Snapshot

When certain event is triggered, an e-mail notice with a snapshot will be sent to the appointed receiver, then the receiver can remote view the live video and audio by using internet browser or zIP View™ on a PC or mobile device.

### • Compatible with Existing Analog Camera

GKB P101 PnP IP video server allows to be connected to any existing analog cameras. Users can easily upgrade its current surveillance system to an integrated GKB Home Care Surveillance System.
