Good Way Technology is a professional IT and CE peripheral manufacturer. We dedicate our focus on Smart Home solution utilizing different wireless technologies. Good Way Technology is one of few manufacturers who are capable to provide a complete solution for Wireless Home Automation products. We provide time-to-market and one-stop-shop service for customized requirement. Good Way has experience and expertise to fulfill different requirements; we are the best choice for your long-term and reliable OEM/ODM business partner.

Z·WAVE®

- All specification and photos are subjected to change without prior notice.
- All trademarks and trade names are the properties of their respective owners.

Flexible, Timely, and Innovative OEM/ODM

Major Business (OEM/ODM)

Business Support

- We offer the "FSCM" service
  - F means fast,we offer the real-time service and support
  - S means small,we have more flexibility in MOQ
  - CM means contract-manufacturing,we are skilled from sample to mass volume manufacturing
- Time-to-Market
  - Always being sensitive to the latest technology and launching at the right time to the market

Private Label / White Box

- One-Stop-Sourcing
  - Comprehensive product range,including PC peripherals, mobile device peripheral,CE merchandise, Home Automation, and industrial connectivity products

Home Care
With the cooperation among Home Gateway and sensors, Activities are under monitoring and reporting spontaneously.

Home Safety
Home Safety - Our products are easy for every member of the family to operate, and there's an access to cloud to give you peace of mind and can even keep you connected to your home wherever you are.

Home Living
Our products allow users to manage their home environment intelligently through the light setting and scene control to bring in convenience.

LIGHT SWITCH

Light Switch is an intelligent device that can be remotely controlled through Z-Wave® network and radio waves. In the Z-Wave® network communications, light switch can be connected to any Z-Wave® gateway. When using radio waves, light switch can be used in conjunction with Z-Wave® gateway. The frequency of radio waves used by gateway and switch is like this: different countries or areas, the radio frequency is different. Each light switch has a unique ID code. When we add or remove the switch from the alarm host, just place light switch in the Z-Wave® network range of gateway. Then we can easily find the switch through the device ID code. In communication with gateway, light switch not only can send signals to Z-Wave® gateway, but also can receive signals from it. When touch the button on light switch, it would send signals to Z-Wave® gateway, then gateway can correctly display the switch on / off state; when light switch receives signals from gateway, the switch state would be remotely switched on/off.
TD1420V(US)/TD1421V(EU)
› Light Switch

- State "on" or "off" of switch can be remotely switched through app
- State "on" or "off" of switch can be viewed through app
- Conveniently and quickly switch power supply
- Assure household electrical safety
- Can be controlled by Z-Wave Gateway

Power	AC 100~240V
