

Smart Fitness Solution

Enhancing the fitness environment for you to work out smartly

IEI Smart Fitness Solution

In recent years, obesity has become a world wide problem. More and more people are aware of the importance of exercise. Many people inspire themselves to join the fitness club or related groups. In the U.S., there are over sixteen millions people attending health clubs on more than 100 days a year; the growth of fitness industry is continually increasing. With the growth of workout population, people are not satisfied with the traditional workout experience. People are looking for something fun and something that can help them to get connected to outside world while they are exercising.

The fitness console developed by IEI can fulfill needs for those people who are not satisfied with the traditional workout experience. With the entertainment system provided by IEI Fitness console, people can watch TV, use social media such as Twitter or Facebook to connect with their friends, and use the virtual running programs to enjoy the scenery and the landscape of other countries while they are running or cycling.

IEI's smart fitness solution can not only fulfill the need for the end user but also for the club owner. IEI's smart fitness solution provide club surveillances, access control and front desk membership management services. With this smart fitness solution, club owners can easily manage their daily operations for the fitness clubs.

Access Control for Gyms, Fitness Clubs

- IOVU Series
- Freescale™ i.MX6 Cortex™-A9 (quad core, 1.0 GHz)
- Porjected capacitive touchscreen
- Wi-Fi and Bluetooth v4.0
- Android 4.2 OS

Security Surveillance and Merbership Management for Gyms and Fitness Clubs

Light Industrial Panel PC - AFL3 PPC Series

- Plastic housing with IP65 front protection
- PCAP/Resistive touchscreen
- Intel® Bay Trail processor

Cloud

Front Desk and Back-end Gym Management

Web base technology

Service

- Membership management
- Club surveillance storage
- Club entertainment system

Digital Signage

- High definition AMD R-Series APU
- Quad HDMI supports multiple independent display
- Fanless design
- Supports IPMI 2.0 via iRIS-2400 module

IEI Smart Fitness- NAS Cloud Solution

Membership Management Service

IEI's smart fitness solution not only offers hardware for fitness consoles but also software for membership management service. This membership management services includs front desk check in service, class schedule arrangement, and membership management. With these membership management services, club owners can easily manage their membership data in anytime, anyplace. It will also help fitness club owners to raise the quality of fitness club management.

Cloud Service Powered by QNAP NAS

IEI smart fitness solution can also provides cloud base service. When customers finished their workout, they can upload their workout data to the cloud service, and their workout history record can be pulled out anytime, anywhere from their mobile devices or from their computers. Club staffs can use cloud service to upload all their daily operation data or surveillance camera data to the cloud service. By doing this, the whole membership service or security service can easily connect with each other in different areas.

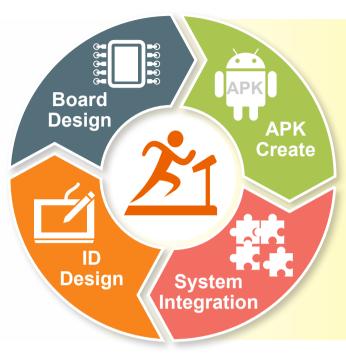

IEI Fitness App

IEI Fitness App is a tool that can help our customers to check their workout record anytime. This app can synchronize member's workout data with the NAS cloud services. The registered fitness members can login to this IEI Fitness App. When they finished running, they can upload their record to the cloud service, and they can use this app to search for their workout history, group class schedule, training assignment and their membership information.

Core Value for IEI Fitness

IEI Fitness provides customized fitness consoles. IEI Integration Corp has many years of experiences in board design, ID design, and system integration. We have highly qualify research and development team to help us to fulfill customers' needs. We also have the ability to integrate different types of boards to different types of motors for treadmill, bike, and elliptical.

Board Design

IEI has many years of professional experiences in industrial computer. Our engineers are fully qualify to design different types of boards, such as main board, lower control board and I/O board. IEI also has its own labs to help our customers to pre-test different types of certifications, such as CE, FCC, and EMI.

ID Design

ODM / OEM fitness customers usually have their own ID design. However, with our professional ID design team, IEI can also provide ID design service for those who need it, from all-in-one console to open frame consoles.

APK Create

IEI Fitness also provide APK design service. We have very strong software teams (OS team, FW team, and UI team) that can help our customers to build their desire APK in their fitness console. With the given software structure, UI flowchart, and UI pictures, our engineers can use their skills to develop an Android APK for our customers.

System Integration

System integration is the most difficult part in fitness console design. IEI's engineers have many years of experiences to integrate different boards and different motors into a system. IEI's engineers are also experienced enough to fulfill our customer's need such as adding some external devices, like heart rate module, BLE module and BT module.

Risc-Based Fitness Console Ready for ODM / OEM

Features

- Support Android 5.0
- Flexible ID Design. (Open Frame or customized ID Design)
- IEI Customer Reference Board (10.1" / 15.6" / 18.5" share the same main board)
- Freescale Quad Core A9 1GHz processor
- 10.1" / 15.6" / 18.5" Color TFT LCD
- Waterproof: IPX5 (For customized ID)
- Support BLE / ANT+ /NFC
- Support ATSC / DVBT TV Dongle

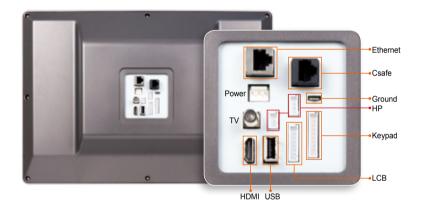

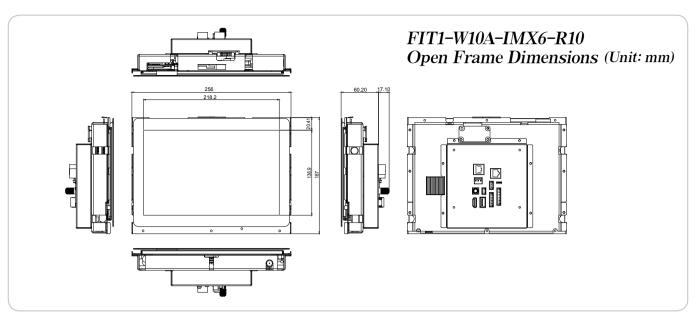

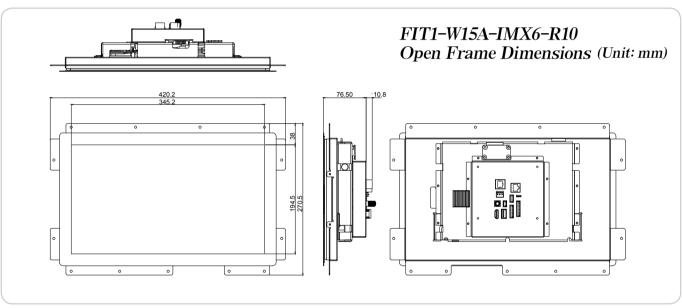

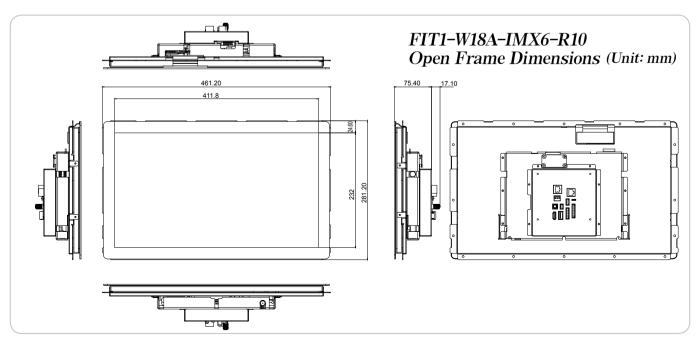

Model	FIT1-W10A-IMX6-R10	FIT1-W15A-IMX6-R10	FIT1-W18A-IMX6-R10
Size	10"	15.6"	18.5"
Resolution	1280 (W) x 800 (H)	1366 (W) x 768 (H)	1366 (W) x 768 (H)
Touch Screen	Projected Capacitive Flat Touch	Projected Capacitive Flat Touch	Projected Capacitive Flat Touch
CPU / Chipset	Freescale Imx6 Cortex-A9 (Quad Core 1GHz)		
I/O Port and Switches	1 x USB 1 x Csafe 1 x HDMI In	1 x Lan Port 1 x LCB Connector 1 x Heart Rate Module	1 x Keypad
Operating Temperature (ambient with air flow)		0°C ~ 40°C	
Storage Temperature		-10°C ~50°C	
Power Requirement		12 V DC Power Input
