

ATNESIS SDN. BHD.

Formerly known as UWC Electric (M) Sdn. Bhd.

OUR STORY

We started in 2003 as UWC Electric Sdn. Bhd., creating electromagnetic locks that are marketed primarily under ALGATEC locally and regionally. In 2018, the company adopts a new name, ATNESIS, to reflect our brainchild creation and its continual growth in the security industry. Today, we are the largest electromagnetic locks manufacturer in Southeast Asia.

We pride ourselves in progressive advancement as we continue to grow the company through technological innovation and exceptional customer service at a competitive price.

We are driven by our strong beliefs in customer first, excellent customer service and complete accountability.

OUR MISSION STATEMENT

To continually deliver the best access control locking systems through high-quality services, trusts and accountability in the global arena.

Sophisticated Design for a Broad Range of Customer Applications

Our global footprint is a testament to our team excellence in combining the superior lock functionalities with exceptional product design to deliver products for a broad range of applications. ALGATEC is fit for all kinds of uses from household to offices, retails, light and heavy industries, and even for outdoors or harsh environments.

Known for our product quality and superiority, we also ensure our products and services are versatile. Therefore, we provide a complete access control locking system with accessories like power supply system, electronic deadbolts, wire loops, exit switches, mounting brackets and more.

With the growing demand for trustable innovative secured access, we at ATNESIS will continue to strive for the best for you.
