

US-0130 UNDERWATER SPEAKER 水底喇叭

◎ FEATURE 性能特點

- 此喇叭適用於水底之中，由於聲音以水為傳播介質，所以喇叭採用特定的結構製成，使其能在水中發出清晰的聲音，加上外觀以流線型設計，結構緊密，可抵擋強大的水壓，廣範圍適用於游泳池、水族館、海洋研究中心等。
- The underwater speaker US-0130 is suitable for underwater installation. Because water is the sound transmission medium, special configuration is adopted in this speaker design to make clear sound available underwater by it. In addition, the streamline design and tight configuration enable it to withstand powerful water pressure from swimming pools, aquaria, ocean research centers, etc.
