ZKS-A3

A3 is an innovative stand-alone fingerprint reader that can be used in Access Control and Time Attendance applications. It can be installed standalone or with any third party panel that support 26-bit Wiegand. Using the fastest North Korean algorithm in the industry, ZKS provide unparalleled precision and speed at less than half the cost of competing vendors. Each reader has the capacity to store up to 3,000 fingerprint templates and 80,000 transactions. Enrolling users is fast and easy, since most of our readers have a user-friendly keypad and display. Managing our readers is also simple. All our readers are easily accessed through a TCP/IP or serial port, with the ability to automatically update and synchronize when networked together. Accept ODM or OEM, providing system local voice, menu language, software analysis, casing-making.
