Video Surveillance

Designed for
Advanced Protection

Seamless Integration of Devices

IP Camera

Battery Devices

Dashcam

Robotics

Light Camera

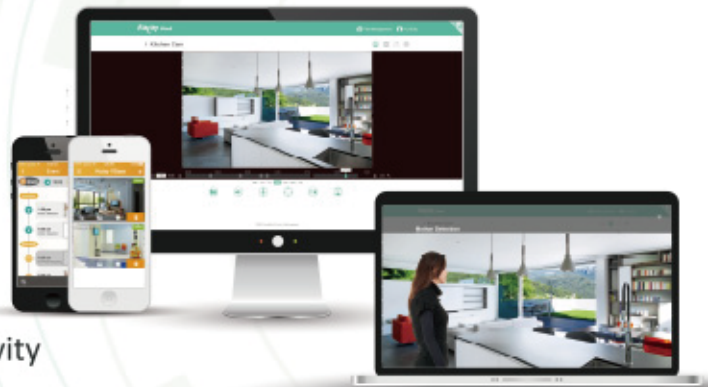

Flexible Plans for Enhanced Security

Live Streaming Service

- Full-duplex audio communication
- Cost-effective solution with concurrent connectivity
- Directly connect to devices to watch live feeds without delays
- Monitor any end point remotely for effective management

Cloud Recording

- Full-time and event-based recording plans
- Store and playback 7 or 30-day videos
- Continuous recording with event tags
- Capture 30-second footage for abnormal activity

Seamless Experience for Remote Surveillance

View live streaming of different locations simultaneously in one screen to know what's going on.

Easily download recorded videos and share event clip with others through social media or mail.

Preview video recordings and event captures on timeline, plus send alerts with text, image or video to user.

Cross platform and support for different OS, browsers, and devices
