# QA16

## Addressable Fire Alarm Control Panel

### Characteristics

- Each loop can connect up to 250 addressable devices. Maximum networking are 32 loops and total addressable points are 8000.
- Large LCD screen (40 x 15 lines) allows more events to be displayed on the same screen.
- Loop device can be set up to be temporarily isolated.
- Individual loop module test feature to save time on panel test.
- On-board Self-test feature for simulating alarm output.
- Easy system programming through PC to panel.
- Events log can store up to 2030 events.
- Specification Optional thermal printer that can printout complete panel status.

QA series can be in single or 32 loops network configurations. This system is designed for all applications with advantages of easy installation, fast and precise detection and simple maintenance. Friendly HL Fire Tool software saves your time from programming. Reliable QA series definitely meets your demands for safety.

### Specifications

Model	QA16
Power	220V AC 50/60Hz *Others also available
Battery Capacity	24V DC 4Ah
Charging Voltage, Current	26V DC 100~1000mA *With auto adjustment function
Zone Voltage, Current	26.5V DC 340mA
System Capacity	250 devices/1 loop *Expandable for site requirement
Exterior Resistance	Round-trip under 40Ω
Transmitting Method	Digital series transmitting
Accumulation Time	0~40 seconds *Other options available
Main Sound	85dB @1M
Material	1.6mm steel plate
Color	Pearl gray
Dimensions (mm) H x W x D	1~4 loop: 400 x 500 x 130 5~8 loop: 600 x 500 x 150

## Addressable Detectors

QA01  
Addressable Photoelectric  
Smoke Detector

QA05  
Addressable Combination  
Smoke & Heat Detector

QA06  
Addressable Heat Detector

### Characteristics

- Address coding by dip switch makes the job easier.
- Latching function helps to identify alarm device clearly and quickly.
- Magnetic test feature makes maintenance easy and simple.
- Non-loosening screws on base terminal for easy installation.
- Detector is made of high endurance, solid and colorfast Fire-proof plastic.
- Detector has passed strict EMC test, which greatly eliminates false alarms caused by interference from nearby sources.
- Dual LEDs for 360-degree visibility.

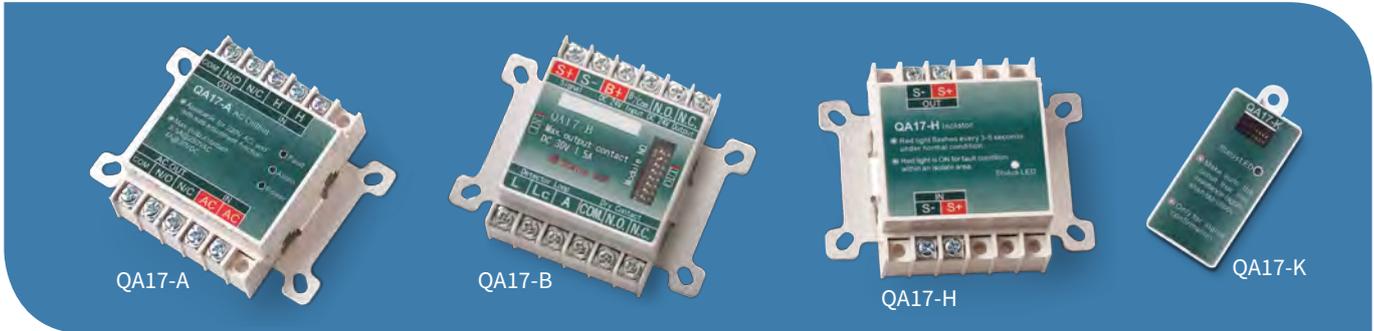

### Specifications

Model	QA01	QA05	QA06
Address Coding		Binary	
Alarm Current		DC26V 6mA	
Standby Current		DC26V 850μA	
Sensitivity Setting		Comply to EN54	
Ambient Temperature		0°C ~ +50°C	
Material		Fire-proof plastic	
Color		White	
Thermal Setting	N/A	58°C	58°C
Dimensions(mm)	102(Dia.) x 48(H)	102(Dia.) x 54(H)	102(Dia.) x 46(H)
Weight	130g	130g	115g

# Module Series

## Addressable Fire Alarm Systems

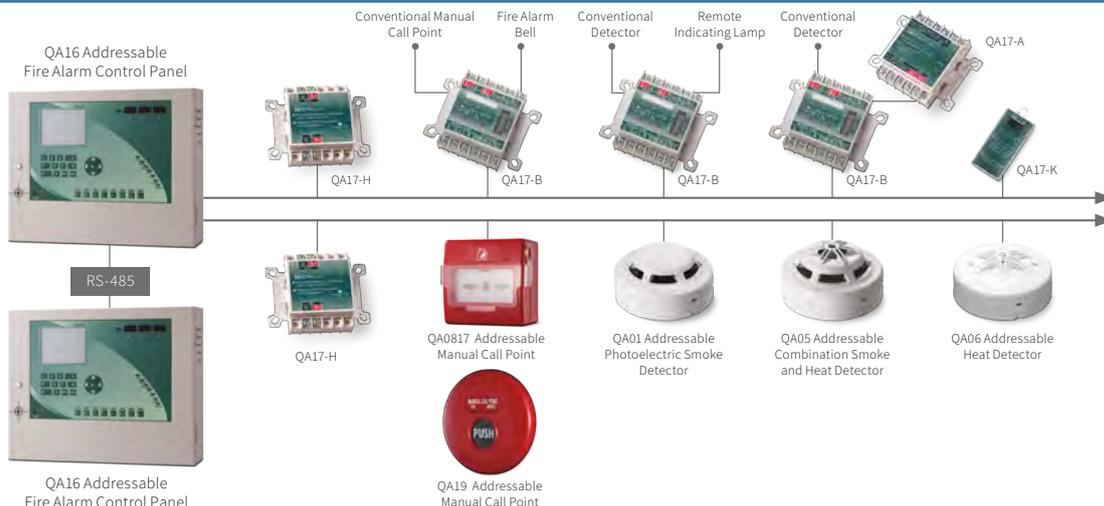

### Characteristics

- Low power consumption in monitoring mode, high stability.
- Easy installation, either single module installation or several modules installed on a special mounting bar. Implanted type gang box is available to suit the decoration design.
- The Module is designed with separate input and output contacts to decrease the difficulty of moving external wiring.
- Control Module QA17-B is designed to control input & output for all kinds of systems. (fire alarm, smoke evacuation, sprinkler, foam, winding door...etc.)
- Output module QA17-A can directly connect with power source. The output voltage from N.O. & N.C. will be the same as input voltage.
- Monitor module QA17-K is designed to monitor security condition, such as water supply, pump action ...etc.

### Specifications

Model	QA17-A	QA17-B	QA17-H	QA17-K
Type	Output Module	Control Module	Isolator Module	Monitor Module
Purpose	Supply higher current such as evacuation	Input & Output for all systems	Isolate from control unit when external fault	Confirmation of external signal
System Connected	Series with QA17-B	Series with conventional detector	Series with all system zone	Receive activation signal from external device
Input Source	24VDC / 110VAC / 220VAC	Loop signal	Zone short circuit	Activation signal
Output Contacts/Load	COM. N.O. N.C. 4A @30VDC, 2.5A @ 250VAC	1 in 2 out COM. N.O. N.C. 1.5A @30V DC	N/A	N/A

## Reflective Beam Smoke Detector

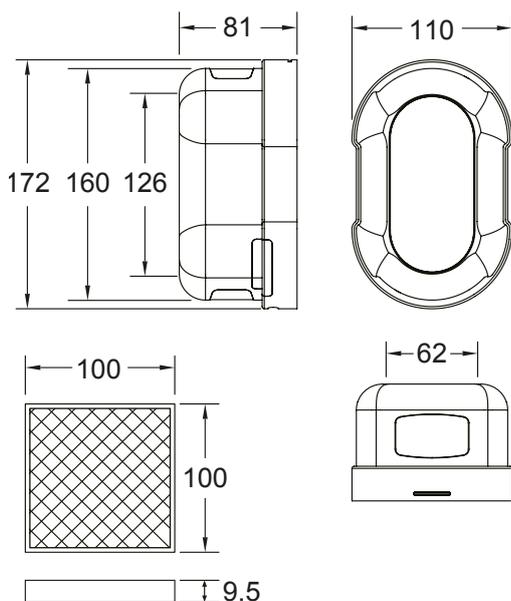

### Operating Principle

The reflective beam smoke detector is a single unit comprising a transmitter and a receiver. The transmitter projects a cone shaped beam of modulated infra-red light to prisms. An alarm condition will be determined when the signal is analyzed to reach up to the settings of retention of smoke. In addition, the system is designed to be wall-mounted so that the beam will project approximately 0.3m to 0.6m below and parallel to the ceiling and the maximum lateral range is 7.5m either side of the beam. The distance between detector and the prism should be within 100m.

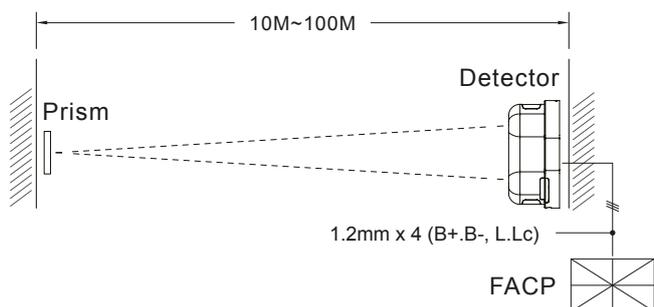

### Features

- The detection level can be set to 18%, 25%, 35%, and 50% to suit different environments.
- Lower current consumption.
- Easy installation & Low potential voltage
- Self-alignment & Automatic contamination compensation.
- Laser-aid alignment.
- Smartphone / Tablet applications display enabled (with blue-tooth module options).
- Application Locations: Warehouses, Factory halls, Departments Stores, Activity Centers, Churches, Museums, Electric Power Stations and Industrial Sites.

### Specifications

Model	EDB01
Operating Voltage	12-30V DC
Standby Current	3~20mA
Alarm Current	20~40mA
Alarm Output	COM/NO (1A @30V DC)
Fault Output	COM/NC (1A @30V DC)
Sensitivity	18%(0.79-0.96dB), 25%(1.25dB), 35%(1.87dB), 50%(2.43-3.16dB)
Operating Range	10m to 50m use one prism 50m to 100m use four prisms
Angular Tolerance	Detector: $\pm 0.5^\circ$ / Prism: $\pm 5.0^\circ$
Ambient Temperature	-10°C ~ +55°C
Material	ABS Plastic
Color	White
Weight	350g (Detector)

# Q01

## Photoelectric Smoke Detector

### Characteristics

- The standard detector is 2-wire or 3-wire. For 4-wire type just add one relay output module on 3-wire base. Simple and easy module placement enables wider application and flexible stock control.
- Detector is made of high endurance, solid and colorfast Fire-proof plastic.
- Non-loosening screws on base terminal for easy installation.
- Detector has passed strict EMC test, which greatly eliminates false alarms caused by interference from nearby sources.
- Dual LEDs for 360-degree visibility. Bi-color LED, Stand-by Status: Green; Alarm Status: Red.

### Specifications

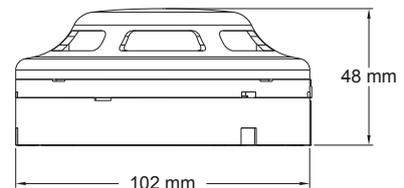

Model	Q01-2	Q01-3	Q01-4
Alarm Contact	N/A	N/A	0.8A @30V DC 0.4A @125V AC
Voltage Range	12 ~ 30V DC		
Alarm Current @24V DC 470Ω	40mA	40mA	45mA
Standby Current @24V DC 470Ω	under 75μA		
Sensitivity Setting	Comply to EN54

# AH-0933

## Mechanical Rate of Rise Heat Detector

### Characteristics

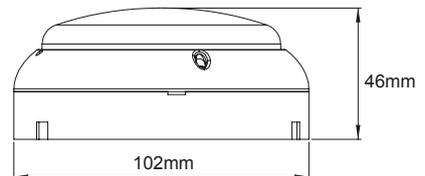

- Detector is made of high endurance, solid and colorfast Fire-proof plastic.
- Non-loosening screws on base terminal for easy installation.
- The unit is completely sealed; its function is not affected by humidity, dust or insects.
- This detector has passed strict quality control and repetitive testing, hence its quality is stable and highly reliable.

### Specifications

Model	AH-0933	
Type	2-wire	
Voltage Range	12 ~ 30V DC	
Alarm Current @24V DC 470Ω	40mA	
Alarm Temperature	Comply to EN54

# IR-0714/IR-0814

IR Flame Detector

IR-0814

IR-0714

## Characteristics

- Built-in high performance Microprocessor that able to analysis flame signal more accuracy.
- IR sensor has better detection range than UV sensor.
- High immunity to sunlight or other noisy source.

## Applications

- Premises with higher ceilings: theater, gym, storage, gallery or warehouse, etc.
- Places where fires happen easily: places storing with combustible goods, gas stations, factory working places, machine rooms, etc.
- Ventilate places: open markets, station platforms, hotel lobbies, department stores, etc. (places that smoke and heat can not gather during early period of fire)
- Others: tunnels, computer rooms, etc.

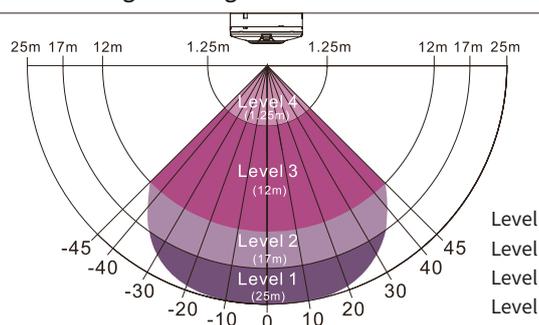

## Specifications:

Model	IR-0714-2	IR-0714-3	IR-0714-4	IR-0814-2	IR-0814-3	IR-0814-4

## Installation Instructions

1. Do not install detector that has fire source nearby.
2. Detection range and angle please refer to diagram as below.

## Detection range and angle:

# AH-9315

## Combination Smoke and Heat Detector

### Characteristics

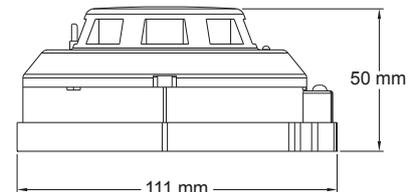

- Multi-purpose Design: when there is smoke or heat during pre-fire period, field situation will vary due to different environments. This combination design is to ensure that the pre-fire confirmation will not be affected by varying environments.
- Smoke gate has a special design to obscure the strong light effectively and allow smoke to come in easily. Water vapor will not gather on the insect guard screen to cause a false alarm.
- Features an accumulated water discharger to eliminate leakage of water from the water pipes or ceiling which may leak into the detector and cause a false alarm.
- This detector has passed strict quality control and repetitive testing, hence its quality is stable and highly reliable.

### Specifications

## Mechanical Rate of Rise Heat Detector

### Characteristics

- Heat-sensing diaphragm can operate for unlimited number of times and is not affected by room temperature. The conducting parts use gold coating to avoid oxidation.
- Uses alloy air equalizer to avoid humidity and stabilize the ventilation function. Alloy itself has many micro-holes that can expel non-fire heat to avoid false alarms.
- The unit is completely sealed; its function is not affected by humidity, dust or insects.
- This detector has passed strict quality control through automatic repetitive testing and been calibrated automatically under stable temperature and humidity conditions. Thus, quality and reliability are consistent from the first detector produced to millionth.

## Mechanical Fixed Temperature Heat Detector

### Characteristics

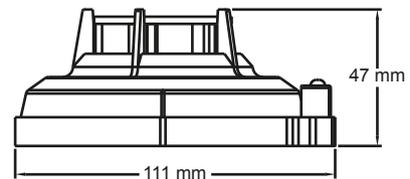

- This detector operates on the temperature differential sensing principle, with a UL approved sensor making mechanical contact. It is made of high quality material, providing excellent contact despite any environmental interference.
- This detector is suitable for locations with high temperatures differentials, such as places (kitchen, restaurant and boiler house) where there is constant use of heat.
- This detector has passed strict quality control and repetitive testing; hence its quality is durable and highly reliable.
- Through its professional design, the heat collector can accelerate its response rate after being heated, and has a protective device to avoid accidental response caused by distortion, bumping and dropping in order to increase the reliable product.
- The unit is completely sealed; its function is not affected by humidity, dust or insects.

## Flame Detector

### Description

The detector has wide-angle sensitivity that can reliably and quickly detect weak ultraviolet radiations emitted by flame. It will not react to room illuminations, infrared or other light sources unrelated to real fire.

### Applications

- Premises with higher ceilings: theater, gym, storage, gallery or warehouse, etc.
- Places where fires happen easily: places storing with combustible goods, gas stations, factory working places, machine rooms, etc.
- Ventilate places: open markets, station platforms, hotel lobbies, department stores, etc. (places that smoke and heat can not gather during early period of fire)
- Others: tunnels, computer rooms, etc.

### Installation Instructions

1. Install at obstruction-free places.
2. Avoid installing near mercury lamps, halogen lamps and sterilization lamps.
3. Avoid installing within sensitive range of welding sparks and radiation.

### Specifications

Model	AH-0014		
Type	2-wire	3-wire	4-wire
Alarm Contact	N/A	N/A	0.8A @30V DC 0.4A @125V AC
Voltage Range	12 ~ 30V DC		
Alarm Current @24V DC 470Ω	40mA	40mA	35mA
Standby Current @24V DC 470Ω	under 100μA		
Sensor Type	Ultraviolet		
Sensitivity Angle	120°		
Sensitivity Range	It can detect flame of 15mm at distance of 3m		
Ambient Temperature	-10°C ~ +55°C		
Material	Fire-proof plastic		
Dimensions	111mm(Dia.) x 47mm(H)		
Weight	About 170g		
Color	White
