Double Claw Bolt

Intrusion Prevention
Infrared Ray Sensor

Enhanced Security
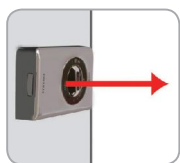

Enhanced Lock / Double Claw Bolt

The addition of double claw bolts is a further measure to prevent forced intrusion, ensuring your safety.

Intrusion Prevention / Infrared Ray Sensor

The door can not be opened even if the Open/Close button is pressed inside unless the sensor detects inside movement.

[When break-in happens]
When the door is unlocked from the inside without sensing any movement inside, the door will not open.

Double Authorization Mode / Both Smart Card & Password

With double authorization mode set up, both password and card must be authenticated to open the door, strengthening security.

One Button - One Touch / Anti-theft Setup

When leaving, the user can set up the anti-theft function by simply pressing 🛡 button, preventing any tempering by creating a warning sound.

Fingerprint Marks are No Longer a Concern

Passwords will be pressed after press two multi-leveled security codes, preventing intruders from checking the fingerprint marks left.

2 multi-leveled security codes appear before entering password

Press the password

Impossible to guess password due to random fingerprint mark
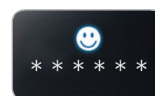

Convenient Accessibility
