

Value Proposition

Home security is also about you and your habits. If you have a large family where someone is almost always home, you may be less at risk than someone who lives alone and is frequently away on business trips. The value of your home and your possessions is also a factor, although thieves can also be tempted by less valuable items if they believe they will be easy to fence. To keep your family safe, you should also include an accident prevention and fire safety plan. These types of dangers can put you and your family at risk as well as threatening to destroy your personal belongings.

UIS Wireless Home Security System(WHSS) provides a turn-key wireless solution that enables home user to secure & monitor and control home environment locally or remotely via key-fob, touch panel, laptop PC or mobile phone. The most important thing is, UIS WHSS does not typically require professional installation, it's far simpler than traditional home security systems (i.e. traditional CCTV) that may require complicated wiring or even re-construction by professionals. With the tools lying around your house, you can be easy to install your wireless security system by yourself.

Security

By providing powerful and highly sensitive wireless security sensors (i.e. Door/Window, PIR Motion, Smoke...), you can be easy to build up a fully secure home environment to protect your house and property from destroying by fire, gas, water, burglars or thieves.

Real-Time Event/Emergency Notification

By providing real-time SMS and Email event notification, you can well prevent any unexpected accidents happened in house. Meanwhile, you can also send out an emergency alert (panic) immediately once required.

Automation

By providing highly reliable automation-type wireless controllers (i.e. Power Switch, Door Lock...), you can be easily to remote control your in-house lighting, device, door and garage.

Cost-Effective

In addition to far simpler than traditional wired CCTV system, UIS WHSS is also providing you a very cost-effective and DIY-able solution to reduce your TCO and also well secure your ROI.

Surveillance

By providing touch panel, WebUI, 3GPP and also highly flexible IP camera connectivity, you can be easily to monitor everything in/out-side your house anytime and anywhere, meanwhile, you can also enable real-time video recording and playback afterward.

Easy To Install/Manage

UIS WHSS is providing a fully wireless but best-of-breed solution by using WiFi, Zigbee-like and 3GPP mobile technologies to get connected with all devices as gateway, sensor, controller, console, mobile phone and IP camera. It's very easy for you to install them in minutes and manage them in seconds.
