FaceID Attendance Access Control System

Matrix Keeper

Matrix Keeper is the next generation of face recognition & access control system

Matrix Keeper

entrance controller system is the next generation of face recognition and access control system.

It is equipped with a 720 Mhz DSP by TI and a 3.5 inches TFT LCD. This system has twin cameras and the infra-red matrix lighting system. All the components are fit in the compact case. It is built to meet the tough industrial standard to withstand the dust and water.

This device is well suitable for indoor and *outdoor use.

The Face-Tek Matrix Keeper is equipped with the proprietary facial recognition algorithm and the IR matrix illumination system. That could circumvent the environmental lighting problem.

There is a real break though of the facial recognition product.

* Additional shield is needed to prevent light & rain. Back-light and glare environment is not allowed.

Reader

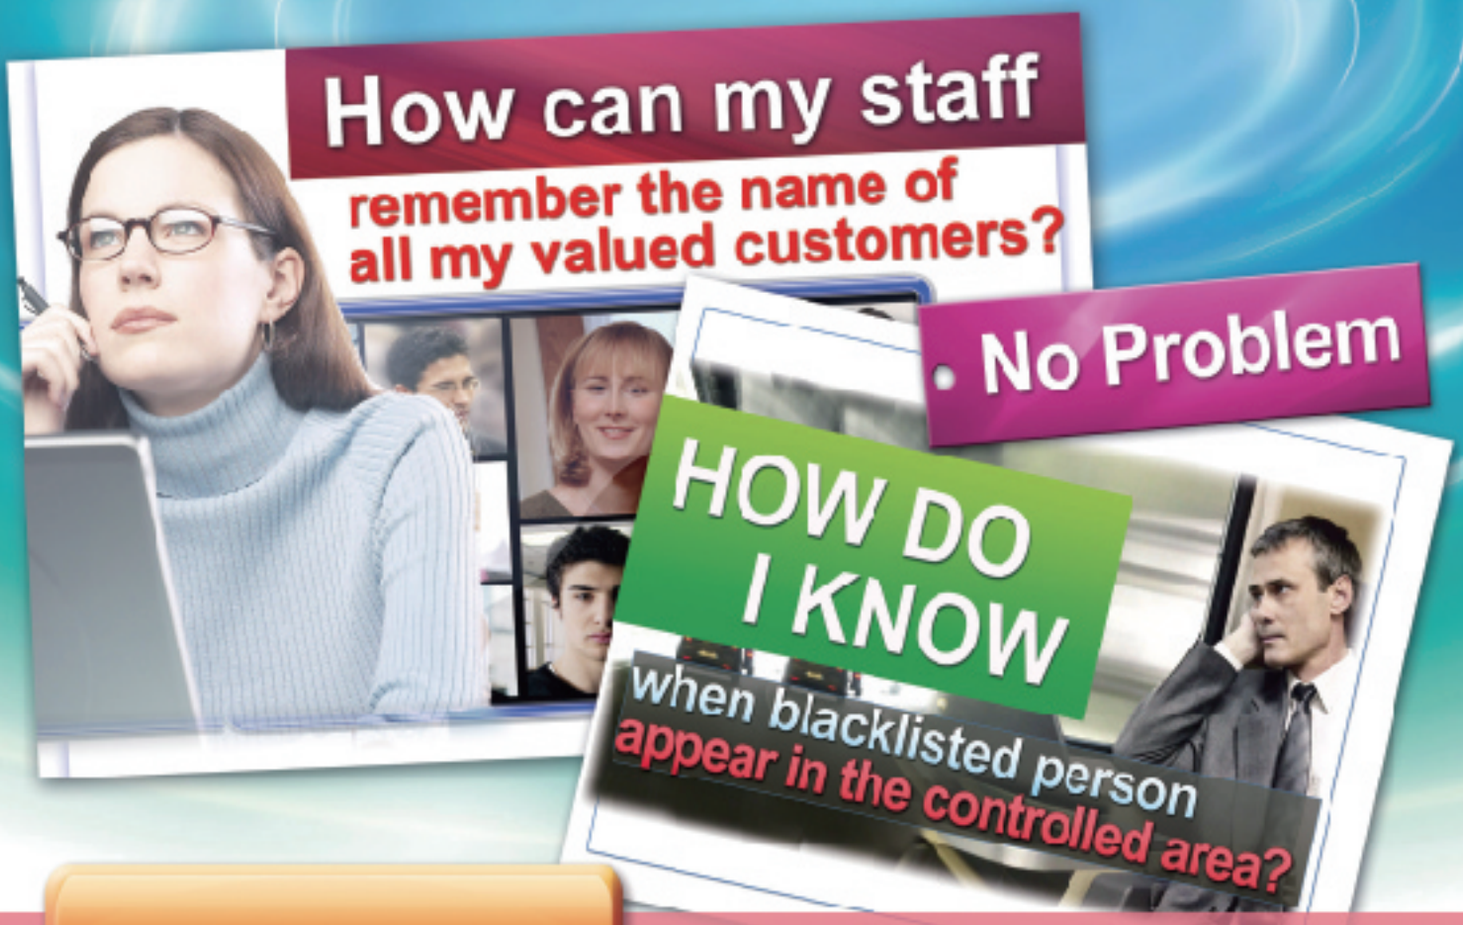
Reader increases access security without compromising functional and artistic design. 2 CCD cameras are integrated to account the height of users and LCD screen offers a quick and easy user positioning for simple use and rapid authentication in under 1 second.

Kiosk

Kiosk offers a robust and stylish access point. It provides strong protection to encase the hardware of Access Control system, yet its ergonomics design allows convenience of use. Incorporating a touch screen, card reader, camera and speakers, it works as integrated system to provide secure access to offices, clubs, labs and other buildings.

* All specifications are subject to change without notice. Please check with your supplier for exact offers. Products may not be available in all markets.

FaceID Recognituon Expert



NotiFace II

Face Recognition Surveillance System

NotiFace II scans faces in crowds of people and analyses their face biometric features to identify a known individual.

With its intelligent face recognition algorithms, Notiface II analyses the input from numerous CCTV cameras, comparing the captured face images with catabese containing previously stored profiles and face terrplates.

The system announces instantaneously when a known individual appears, alerting cperators to take proper actions.

NotiFace II instantly recognizes your VIPs whcse faces previously enrolled in the system, assisting your staff to greet your important customer by their names.

Features
