

# H3000

## Key Management System

Landwell H3000 is an electro-mechanic key management system, that provides easy plug and play solution to users, which saves the hassle of having to follow the interminable instructions for the installation.

### General

- Stand-alone Plug and Play solution with advanced RFID technology
- Android Touchscreen interface
- PIN, RFID tag and Fingerprint access to the keys inside the cabinet
- Separate replaceable key slots without opening the back of the cabinet
- USB connector exporting generated reports of key records
- Keys are securely attached using RFID tags and strong key rings
- Software built inside the Android system which saves the downloads of the setup package
- Robust fixing points allow secure wall fixing
- Operated with optional battery backup

### Features

- 15 expandable, robust, long-life iFobs with secure key rings and RFID tags
- No extra seal between key and fob required
- Users with assigned access to certain keys, admin manages main authorities such as registering users and assigning access
- Event log
- Signalization of prolonged key absence
- Multilingual functionality
- Android touchscreen and system combining auditing, tracking and reporting of keys or keysets where the reports are exportable via USB connector
- Immediate alarm for any overdue key take or return, with red warning LED light in relative key slots and audio
- Emergency key releasing
