# IPSecurityCenter™ for Safe Cities
## Solutions Guide

CNL

A collaborative approach to the creation of safe and secure cities that creates efficiencies and drives better economic outcomes

**Prepare for a better tomorrow with a future-proof platform that can do so much more for safe cities applications**

# IPSecurityCenter™ for Safe Cities

**CNL**

Enabling inter- agency use of existing CCTV assets and intelligent utilization of new technologies can be a significant force multiplier in the protection and security of our cities.  Lack of collaboration can result in disjointed on-site information and communication slowing response and decision making to effectively deal with events.

Today we need effective public safety solutions for incident prevention, emergency response, and evidence collection that address the challenges of investment, surveillance blind spots, unclear images and speed of video retrieval.

We now have the technological capacity through City-wide sensor and communication networks to collect enormous amounts of public safety data about our environment and the challenge is to mine it for patterns and correlations that will guide emergency responses and improvements to key city services.

## SECURITY IS AN ESSENTIAL PART OF SAFE CITY LIVING

IPSecurityCenter™ is used by a wide variety of unitary and urban development authorities around the globe, which provides us with valuable insights into the specific challenges encountered in integrating different system and aggregating key data to support decision making.  Users of IPSecurityCenter benefit from:

- Access to previously unconnected CCTV systems, owned or operated by others that creates greater opportunities for to drive availability of visual intelligence for all responders and enable significant cost

efficiencies

- 
- Ensure greater collaboration between Staff, emergency services, and enforcement teams through our workflow engine & common operating picture for improved detection and quicker response and apprehension times

- Visualize the health of your system through customizable dashboards to give you deeper insights into issues that affect your system performance and compliance with  standard operating procedures

- Proactive emergency preparedness, better emergency planning, and management of security and facilities

## SAMPLE SAFE CITIES INTEGRATED TECHNOLOGIES

| | | | |
|---|---|---|---|
| Gun Shot Detection | Face Detection | Vehicle Tracking | People Tracking |
| Drone | CCTV | Video Analytics | LPR |
