I www.boonedam.com

We deliver a broad range of innovative, high-quality entrance products and services that meet our customers' needs for efficiency, security and aesthetic design. All round the world.

Years of experience meeting a wide variety of demands allow us to combine our expertise with your professionalism, providing precisely the solutions you seek.

Company history

From humble beginnings in 1873 in Amsterdam, Boon Edam has grown into a truly global enterprise with hundreds of employees in group companies across Europe, Asia and the

Americas plus distributors in dozens of other countries. Our success is the result of strong corporate values; customer focus, innovation, expertise and a genuine commitment to service.

Customer focus

We are involved in our customer's world; our solutions are the result of the joint professionalism of Boon Edam and our customers. To deliver the desired outcomes, Boon Edam works collaboratively from start to finish in order to provide the best solution for the customer's specific needs.

We give detailed advice on access control, safety, entrance capacity and energy saving, often backed up with advanced calculations. We bring together the worldwide knowledge and commitment of our highly skilled, well-educated engineering staff and the resources necessary to deliver projects in time and on budget.

'Our solutions are the result of the joint professionalism of Boon Edam and our customers.'

Our expertise

Customer satisfaction is our guarantee of remaining the global market leader. With a worldwide network of subsidiaries and distributors we can offer you not only competitive prices, but more importantly, market leading quality and unrivalled expertise.

Innovation

At Boon Edam, we are committed to delivering the best possible solution. Our vision on innovation is that this must be a continuous process and we therefore strive constantly to improve our products, services and processes. We invest heavily in new material and technology research to bring the best possible products to market.

Our success is the result of visionary employees who use innovation and technology to effectively serve our customers. Providing solutions is what a valued business partner is all about.

*‘Providing solutions is what
a valued business partner is all about.’*

High quality

Royal Boon Edam is ISO-9001: 2000 certified, which means that our processes are focused on optimising customer satisfaction. Our quality systems meet the highest international standards with regard to product design, purchasing, production, testing, documentation, delivery and service. This guarantees top quality products.

As you would expect from the global market leader, our products also meet the requirements of norms and standards around the world.

Meeting the needs of current and future generations through efficient resource use

Boon Edam has a proud heritage of producing energy efficient products. For over 100 years, our revolving doors have been helping conserve energy by reducing building energy loss and prevention draughts.

In addition to helping our customers save energy however, we recognise that, as a global market leader in our field, we have a responsibility to "create and support programmes that conserve valuable energy resources and improve the quality of life for people worldwide".

Shorter logistics paths

Manufacturing companies in China, The Netherlands and the USA enable us to manufacture as close to our markets as possible, creating shorter logistics paths and reducing energy consumption.

Green initiatives

All Boon Edam manufacturing and sales companies operate a programme of green initiatives, targeting energy efficiency, prevention of pollution, recycling and waste management.

Green products

Environmentally conscious product design has been a way of life at Boon Edam for over 100 years and this continues today in our research programmes that actively develop new green products, materials and manufacturing methods.

Combining quality engineering with flexible design and complete customer support, Boon Edam supplies the largest portfolio of revolving doors available. Whatever the scale and purpose, our designs can be adapted to meet almost any criteria.

A revolving door creates a highly prestigious, safe and efficient entrance to almost any building. It also provides the optimum solution between the outside and inside of your building as it is always open, yet always closed. This ensures immediate savings on energy costs along with creating a comfortable environment for staff and visitors to your building.

Manual Revolving
Doors

Automatic Revolving
Doors

Special Purpose
Doors

*'A revolving door is always open,
yet always closed.'*

Combining innovative products, quality engineering and complete customer support, Boon Edam supplies an unrivalled range of revolving and special purpose doors worldwide.

Manual Revolving Doors

With a wide choice of finishes and sizes, plus a comprehensive array of options, our high quality Tourniket and Crystal Tourniket manual revolving doors provide safe, reliable and convenient entrances for almost any building.

Automatic Revolving Doors

Larger versions of our Tourniket and Crystal Tourniket revolving doors are often automated for greater user comfort while our three largest revolving door models; the Tournex, Duotour and Twintour are always automated due to their size. Large automatic revolving doors can handle high volumes of pedestrian traffic flow and accommodate trolleys, stretchers and shopping carts.

Special Purpose Doors

Our two special purpose doors provide for those slightly unusual or difficult applications. The Circleslide, with curved sliding doors, provides completely free access and the Flowslide combines revolving and sliding door technologies to allow two streams of people to flow through a junction point without merging.

Security Access

Today's world demands accessibility and security at the same time. Combining these apparent contradictions is challenging, but accessibility and security meet each other in Boon Edam's wide range of ingenious security products. We have developed one of the most sophisticated ranges of security access products that is available today, allowing you to monitor and manage the flow of people into and around your premises.

Our security access products are capable of interfacing with virtually any access control system throughout the world. Boon Edam companies and distributors work closely with security system providers to ensure seamless integration and trouble-free operation.

Security Doors & Portals

Waist High Turnstiles

Pedestrian Security Lanes

Full Height Turnstiles

Access Gates & Barriers

High Impact Vehicle Barriers

Security Doors & Portals

High security revolving doors and portals are used to directly control pedestrian passage. Often including sophisticated sensor systems such as StereoVision technology to ensure single person entry per authorisation, these products are designed to remove the need for manned guarding at access points.

Waist High Turnstiles

Boon Edam waist high turnstiles provide a versatile and effective means of controlling pedestrian access in almost any location.

Pedestrian Security Lanes

Pedestrian security lanes combine security access with rapid throughput and are especially effective in areas where large numbers of people need to be monitored. With sophisticated anti-tailgating sensor technology, they provide discreet control of the flow of visitors or employees when linked with access control systems.

Full Height Turnstiles

Boon Edam offers a variety of full height turnstile models, suitable for both indoor and outdoor use. Designed to integrate with any access control system, these products are particularly applicable in corporate car parks, leisure parks, playgrounds and stadiums.

Access Gates & Barriers

Usually used in conjunction with other Boon Edam waist high turnstile products, access gates and barriers are designed to complete security barrier installations, typically within corporate or government office reception areas.

High Impact Vehicle Barriers

Boon Edam provides a complete line of vehicle counter terrorism barrier products to enhance any perimeter security system. Our active vehicle barriers are tested against the internationally acknowledged US Department Of State impact rating and certified for the highest possible level of protection.

*‘Our products allow you to monitor
the flow of people into your premises.’*

At Boon Edam we do not stop when we have sold you the product. Our Advanced Door Care programmes will give you the cover and comfort of knowing continued safe entrance operation is readily to hand. As our entrance products are often installed at main entrances and high security areas, we recognise that professional installation and rapid response times in the event of a breakdown are essential.

We employ well trained and highly skilled engineers to ensure professional installation of revolving doors and security access products. Our engineers carry out service and maintenance of entrance products across the industry.

Retrofits &
Upgrades

Service &
Maintenance

Retrofits & Upgrades

We also offer tailor made solutions for entrance modifications, ranging from refurbishment of old equipment to full safety, environmental or security upgrades of existing entrances.

Service & Maintenance

No matter how good any equipment is, mechanical failure can never be totally ruled out. Investing in timely maintenance saves trouble and cost in the long run, while extending the lifetime of your equipment. As customers have differing needs, we offer a range of standard and custom service and maintenance programmes, designed to cater for all needs.

‘Professional service and rapid response times.’
