Infinique's Data Communication Products

High Performance and Reliable Data Comm Solutions

Infinique has designed and developed quality products with affordable pricing for communication infrastructure solutions. This position has been achieved through our core principle of delivering maximum performance through design excellence. We built our business and products based on high product quality, trust, excellent service and with an aim to deliver first class service and solutions to our customers.

Fiber Systems

Infinique's fiber solutions are designed for communication needs of higher capacity and support up to and beyond 10 Gb/s data throughput. They are an ideal fiber solution for high-speed LAN backbones, storage area networks (SAN) and FTTH applications.

Copper Systems

End-to-end copper solution of Infinique range from cables, patch panels, patch cords, jacks, face plates, and support different applications needs such as 10G Category, Category 6, Category 5E and Category 3.

Enclosures

Infinique offers a wide range of enclosures which includes the Elite Series Server Cabinets, FTTH cabinets, single and double section cabinets. Our Elite server cabinets are designed for applications that require the highest quality and most advanced features. These server cabinets provide quality, protection and security for mission critical equipment. To complement the enclosures we offer a wide range of shelving, power, temperature control, cooling units and grounding bars.

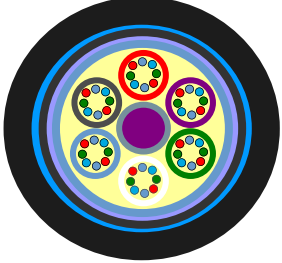

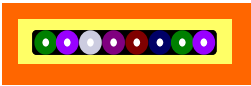

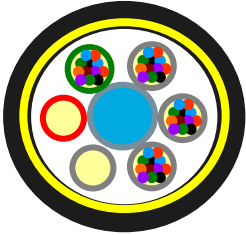

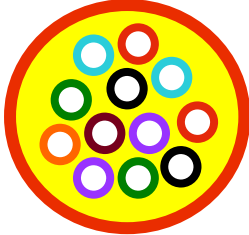

Conformance

Infinique products are manufactured from high quality materials and are fully compliant with the industry standards providing customers the confidence about guaranteed product performance.

For close to a decade, innovation and excellence in quality have been the driving force behind Infinique's success. The end-to-end solutions strategy gives our customers the flexibility to deploy our products on projects of any size.
