

## New VEO-XS

Smaller. Slimmer. More essential

**VEO XS**  
by FERMAX

## SMALLER

Our new Extra-Slim VEO-XS monitor is reduced in size.

This, combined with its high-quality materials and excellent finish, make this monitor the ideal accessory for any modern, functional home, integrating seamlessly and adding a touch of quality to any living space.

Small in size, big in performance

The new VEO-XS includes all the elements you are looking for in a 4.3-inch wide-screen colour video door entry system: hands-free technology, call and conversation, volume control, auto-start, image control, ringtone selection and silent mode.

Volume control

## SLIMMER

VEO-XS avoids the need for a handset and allows for simple, intuitive handsfree communication.

**Extra-easy operation**, it can be used with just one finger.

Answering a call and starting a conversation is now as simple as pressing a button.

In addition, the **OSD menu** and the layout of the buttons allow you to access any of the functions using just your finger.

## MORE ESSENTIAL

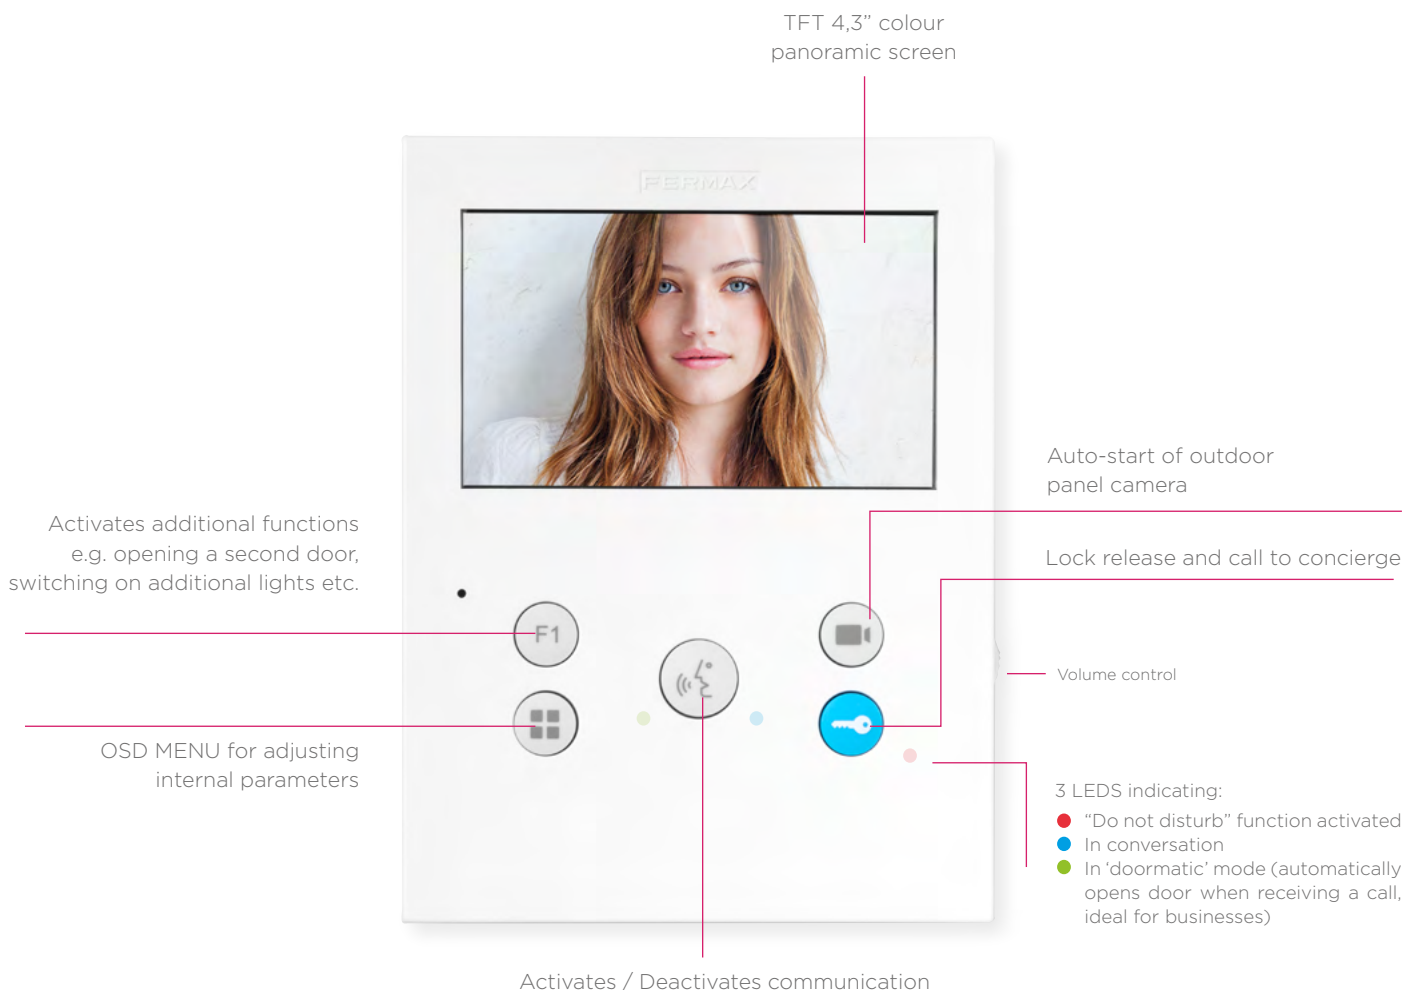

VEO-XS is an essential development of the Veo monitor.

It is a practically indispensable option for those users who want to make the leap into video, enjoying the simplicity, service and comfort of hands-free technology.

**DUOX Technology** Available in DUOX technology (the digital solution created by Fermax with 2 non-polarised wires). VEO-XS is also easier to use in terms of its technical aspects, greatly simplifying the installation, wiring and programming of the monitor.
