

“Forewarned is Forearmed”

KNOW IF YOUR DOMAIN IS
BREACHED OR CREDENTIALS
ARE COMPROMISED!!

CAPABILITIES

- More than 5,000 Darknet Sites/Forums covered
- In-house Indexing
- More than 7,000 Total Sources
- 24/7 autonomous and intelligent monitoring

OVER 60%

of network breaches are traced back to credentials!!!

- Microsoft, 2017

“Many of the breaches have gone undetected for weeks, months and sometimes years.....We call this the Breach Detection Gap (BDG) or dwell time, and it is defined as the time elapsed between the initial breach of a network by an attacker and the discovery of that breach by the victim.” - Infocyte, 2017

OverWatch™ scours the internet, darknet, social media, and thousands of other data sources to identify if your domain is breached or user credentials are compromised. Operating 24/7, OverWatch™ immediately identifies evidence of compromises or breaches.

Powered by Argos™ Artificial Intelligence, and utilizing a collection of friendly computer robots, OverWatch™ is cutting edge technology, second to none!

Most data loss happens before a company identifies that their networks have been breached. - such as Target, Netflix, Equifax, and many others.

Detecting compromises and breaches quickly allows you to react! With 24/7 monitoring, and immediate alerts, you will be prepared to protect your data and your company!

146-days

is the 2017 Global Breach Detection Gap

- FireEye Report, July-2017

The Equifax data breach in **May 2017** was not discovered **until July 2017**

Equifax, September 2017

81% of intrusions

are not detected by internal security - but rather by news reports, law enforcement notifications, or external fraud monitoring.

Financial firms take an average of **98-days** to detect a data breach

Ponemon Institute, 2017
