Scale Efficiently

Advanced Behavioral Analytics

**TODAY** — **TOMORROW** — **ROADMAP**

The ultimate solution for scaling security guard control monitoring stations. **viisights true** handles automatically all video verification alerts. While pinning the true ones and filtering false alerts that are mostly originated by surveillance cameras motion detectors which are highly sensitive to changing conditions (light, weather, bugs). **viisights true** is a guardian gateway software system powered by artificial intelligence trained to reduce 70%-95% of false alarms and facilitates efficient supervision and control.

## About viisights

viisights is a leading provider of behavioral understanding systems for real-time video intelligence that leverage unique artificial intelligence technology. The company provides behavioral understanding systems for safe and smart cities, smart enterprises, critical infrastructures, transportation hubs and shared mobility initiatives. viisights' mission statement is to develop artificial intelligence technologies that facilitate human-like video understanding, in order to create fully autonomous video intelligence systems powered by pattern prediction technology.
