Day & Night

H.264

- 5 megapixel resolution
- H.264 / MPEG-4 / M-JPEG
- Full HD frame size at 30 fps
- 8 ROI (Region-of-Interest) with independent streaming
- Day / Night function
- RS-485/RS-422/ DI/DO richer interface
- Intelligent Video Surveillance : face detection
- Privacy mask
- NAS and 32G SDHC for event recording

Users can define up to 8 independent ROI

Multiple-stream, independent transmission

Different frame rate and compression format of each area

EV8180F is ideal for advanced IP surveillance applications.

For example, factory surveillance has been a critical application for events and conditions such as accidents and large floor area. This outstanding camera is able to meet the demanding requirements.

The intelligent video surveillance conducts face capture and storage, automatically detecting human faces;

8-ROI with independent streaming help focus on the target area and dramatically enhance the overall efficiency;

32G SDHC guarantees long-time recording and 1080p full HD delivers excellent image quality.
